

Reviewers Guide: MobiTV for Windows Mobile 5.0 Pocket PC and Smartphone

Thank you for reviewing our newest version of MobiTV! We are excited to offer an amazing viewing experience and channel line-up for the newest family of Windows Mobile 5.0-based Pocket PCs and Smartphones, including the Sprint 6700, Cingular 8125, and Palm 700W. MobiTV on Windows Mobile features full screen viewing, a graphical program listings guide, portrait and landscape support and much more. The monthly service offers users unlimited viewing of over 20 channels of live news, sports, entertainment and full length music videos.

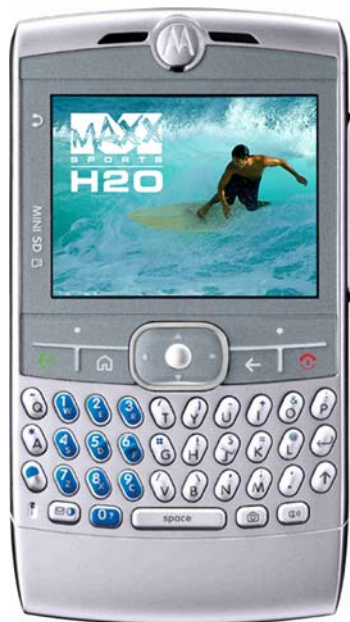

*Figure A: The MobiTV **mobile information guide** let you view what is currently on and what's coming up.*

*Figure B: Users can use the **mini-guide** to browse channels without interrupting what they are currently watching.*

*Figure C: Users can watch MobiTV in **full screen mode** on both Pocket PCs and Smartphones*

Broad Device Support

MobiTV is available for the following Windows Mobile 5.0 devices:

- Sprint 6700
- Alltel 6700
- Cingular 8125
- Cingular 2125
- Palm 700W

Support for new devices will soon be added to the list. MobiTV does not currently support VGA devices (640x480 pixels) or earlier releases of Windows Mobile.

Purchase from both Desktop and Device

Consumers can view unlimited MobiTV by downloading the MobiTV application and purchasing a subscription of **\$9.99 per month**.

From a PC:

1. Browse to <http://www.mobitv.com> and purchase MobiTV for Windows Mobile
2. Download the installation file (also known as a .cab file)
3. Start the installation and connect your device through Active Sync to complete the installation, as prompted; or copy the .cab file to your device and use File Explorer to run the file.

From any Windows Mobile 5.0 device:

1. Open Pocket Internet Explorer and browse to <http://mobile.handango.com>
2. Search for "MobiTV" and purchase the monthly subscription
3. Download the installation file to your device which will be delivered to you over-the-air
4. Using File Explorer on your device, locate the file and begin the installation

Coming Soon

Discovering and downloading MobiTV will also be even more convenient through on-device carrier application catalogs such as Sprint Software Store and Cingular Media Mall, later this year.

Simple and Familiar User Experience

Program Guide

- To see what programs are currently on and coming up, access the Program Guide by selecting "Guide" on the right soft key or from the Main Menu.
- Use the up and down arrow keys to scroll through the channels, and the left and right arrow keys to scroll through times. Select the channel.

Browse Channels while Watching TV

- While watching video in TV Mode, hit the up or down arrows on your device to scroll through available channels. Select a channel.

Watch TV in TV Mode

- Select "TV Mode" from the menu and wait a moment for the TV channel to tune in.

Watch TV in Full Screen Mode

- Select "Full Screen Mode" from within TV Mode and wait a moment for the TV channel to tune in. To switch out of full screen mode, hit any button. Note that buffering will cause full screen mode to exit.

Volume

- Adjust volume using device volume buttons on your device or select Mute/Unmute from the Menu. Changing volume will take the user out of full screen mode.

A Variety of Channels

MobiTV offers over 20 channels of compelling news, sports and entertainment, and is working with leading content providers to continually expand the channel selection. Current channels offered include:

News & Weather

- MSNBC
- ABC News Now
